"Clever little SEM" - performing advanced & automated EDX with a benchtop SEM

MATS ERIKSSON & JULIA NETRYAL

Fully-integrated EDX analysis has always been available for the Hitachi TM3000, providing quick and intuitive chemical microanalysis. Now fully-comprehensive EDX analysis is available meaning Hitachi's TM3000 can do more than you ever thought possible in a benchtop instrument. Advanced and fully automated microanalysis can now be performed in a cost effective and compact system. The workshop will explore the applications of automated analysis, classification and reporting in forensics, environmental monitoring, process control and geology. Live demonstration of the capabilities will also be available.

European Microscopy Congress (emc2012)
16th-21st September 2012
